

size : 300mm x 155mm

Shriram Cronos™

Unique micronized Chitin
from biological source

Strengthen the crop's root formation and cell structures
Stimulates the plant's natural ability to resist soil borne disease and pests
Increases plant growth, development and yield

Percentage Composition **% Weight**

| | |
|---|----|
| Chitin: (Poly-N-acetyl-D-glucosamine) | 60 |
| Total Free L-amino acids, Moisture, carbonic hydrates and Minerals: | 40 |

- ▶ On application in crops results in stronger roots and cell structures
- ▶ Induces the crop to resist against soil borne pathogens and pests
- ▶ Stimulates crops overall defence mechanism
- ▶ Escalates the plant growth, improvement and yield

FOR AGRICULTURAL AND HORTICULTURAL CROPS

Dose & Method of application In tree crops mix 800g Shriram Cronos with 800 kg of FYM compost or farm soil and apply in 1 acre as band placement. Ensure that Shriram Cronos reaches the root system of the crop. Apart from band placement, Shriram Cronos can be broadcast in other crops suitably mixed with sand when soil is having sufficient moisture. Always apply Shriram Cronos during early stages of the crop or even just before sowing when the land is ready. Always second application is recommended within 30-45 days to have expected growth effects and better crop free from the pressure of soil borne diseases and pests.
